**ARTICLE VI
ARCHITECTURAL CONTROL COMMITTEE**

Architectural considerations and preservation of natural amenities are major planning objectives in the development of Elbo Creek Estates, Unit Two

Subdivision. The items outlined herein are not intended to be unduly restrictive or inflexible, but rather to be used as minimum standards to attain and maintain a desirable level of consistency and quality in community appearance and generally maintain property values throughout the Subdivision.

The Association shall have a standing committee to be named The Architectural Control Committee, of not less than one nor more than 3 members, to be appointed by the Association Board of Directors to review and implement the requirements of this Section. The Developer has the right to be the sole member of this committee until the last Lot is sold.

Plans Approval. No building, structure, or improvement including, but not limited to basement excavation, grading, walls, fences, major landscaping, etc, shall be commenced, constructed, or maintained on any Lot, nor shall any exterior addition, change, or alteration thereto be made until proposed building plans or improvement plans have been submitted to and approved in writing by the Architectural Control Committee. Generally, building and improvement plans will include, but not be limited to:

- (1) A site plan indicating property lines, location of proposed structure and/or side improvements, and location of easements and setbacks.
- (2) A floor plan(s) indicating wall lines, room use, window and door locations, and overall structure dimensions.

approved plans. The Architectural Control Committee shall act upon the plans and specifications submitted within seven (7) working days after receipt of all first time construction and within thirty (30) days for homeowner revisions and additions.

If no action is taken by the Architectural Control Committee within the specified periods, the plans shall be deemed approved. Should the Committee reject a plan or make a request for changes and the plans are subsequently resubmitted, the Committee shall have ten (10) days upon which to act on the resubmitted plans.

Other Requirements. Approval of plans by the Association in no way abates or deletes compliance with or the securing of any approvals, permits, codes, or ordinances which may be required by Pottawatomie County and/or any future governing authorities, now or in the future.

ARTICLE VII BUILDING/LOT USE RESTRICTIONS

Land Use and Building Type. Lots 51 through 113, inclusive, are zoned R-1 and shall be used for single-family household units. No manufactured or mobile home shall be permitted. 'Modular Homes,' defined as off-site, stick built homes that have wooden floor joists, may be permitted on the Lots, only after the receipt

of the prior written approval of the Developer, such approval being in the Developer's sole discretion.

Approval of Construction Plans. No structure or improvement set out herein shall be commenced or maintained until: (1) approval of compliance with provisions specified herein by the Architectural Control Committee; and (2) all necessary permits have been issued by Pottawatomie County. After approval, however, the Owners are encouraged to delay installing structures or improvements, such as fences and sprinkler systems, until such time as the water drainage characteristics of the Lot have been evaluated and characterized.

Basements. All single family residential dwelling structures erected on the Lots shall have either an enclosed basement or walkout basement with a square footage of at least 50% of the first floor area. An adequate drainage system and exterior waterproofing shall be installed around the perimeter of the basement. In the sole discretion of the Architectural Control Committee, a slab home may be permitted, but any slab home must be built so that it appears as if it has a basement. The lowest floor of any home, including the garage, must be 24 inches above the final grade at curb level, unless the Owner receives prior written approval for a different level above the final grade from the Architectural Control Committee.

Roofline. No roofline shall have less than a 5/12 pitch.

Building Construction. Building siding shall be of brick, stone, stucco, wood, Masonite or any combination of the above. A minimum of 80 square feet of

Brick, Rock, or other comparable material that has been approved by the Architectural Control Committee, shall be attached on the front of each home.

Exterior Materials and Colors. Exterior surfaces should be of natural appearing materials and colors that blend and are compatible with the natural landscape and adjacent homes. Earth tone colors are recommended. Metal exterior surfaces and metal roofs shall be subject to the review and disapproval or disallowance by the Architectural Control Committee.

Set Back Requirements. All structures shall maintain a minimum front set back distance of twenty-five (25) feet to the wall line from the street ROW/property line and a minimum of eight (8) feet to the nearest structure wall line from all other property lines, and a minimum rear set back of distance of fourteen (14) feet to the wall line from the rear property line. A variety in set back distances and first floor elevation from Lot to Lot is encouraged.

Minimum Floor Area/Building Height. All single family residential dwelling structures within the Subdivision shall have the minimum square feet set out herein. All one level ranch homes will have a minimum of 1050 square feet exclusive of garage, basement, porches, and deck. All single family dwelling structures of one and one-half (1½) or two (2) stories in height must have a minimum of 900 square feet on the main floor and 400 square feet on the second floor, exclusive of garage, basement, porches, and decks. The maximum height of any dwelling structure shall be two (2) stories.

Garage and On-site Parking Requirements.. Each single family residential

dwelling structure shall include at minimum a one car, attached garage and two (2) exterior on-site parking spaces of 200 square feet per space included within the driveways. All on-site parking space shall be located entirely within Lot property boundaries.

Sidewalks. Each Lot shall have a five (5) foot wide sidewalk across the entire front of the Lot and residential dwelling structure, beginning two (2) feet from the street and curb. For corner Lots, five (5) foot wide sidewalks shall be placed across the appropriate side yard nearest the street, beginning two (2) feet from the street and curb.

Outside Antenna. Television or radio antennas shall not be allowed. Satellite dishes may be allowed if approved by Architectural Control Committee. The foregoing covenant shall not apply to a 'community antenna' necessary for the implementation for a cable TV system to serve the Subdivision and the surrounding areas.

Construction Time Limitations. The major intent in the conveyance and selling of Lots within the Subdivision is to encourage the construction of single-family dwelling units thereon. No Lot shall be purchased and held in a vacant condition beyond one (1) year without approval of the Board of Directors in writing on an annual basis. All construction improvements, alterations, etc., commenced shall be pursued diligently to completion with nine (9) months of the starting date. A vacant Lot will in no way exempt the Lot Owner from Association Regular or Special Assessments or minimum utility charges beyond the first six (6) months

of ownership, such 6 month time period being computed from the date of the first deed transfer from the Developer to an Owner. The maintenance and mowing obligations to ensure visual quality of the Subdivision begin at the date of conveyance. The Board of Directors may assess and levy a reasonable charge against an Owner for Failure to comply with the requirements of this paragraph with the concurrence of 66% of the member of the Board.

Prior to and during construction, all Lots must be maintained in a sightly manner, and grass and weeds must be regularly mowed. Notwithstanding the terms of Article IX of this Declaration, should an Owner or his contractor fail to comply with this requirement, the Board of Directors may, without providing prior notice to the Owner, perform the mowing or other Lot maintenance and charge the Owner through a Special Assessment to the Owner's Association dues account. The Owner will be provided a notice of such Special Assessment, and if the Costs and expenses necessary to correct violations remain unpaid after 60-days, the debt to the Association shall become a lien as of the date of the filing of a notice of said lien in the Pottawatomie County Register of Deeds Office, enforceable as a lien upon recording of the debt and lien in accordance with Kansas lien law.

Landscaping. All ground surfaces disturbed by construction activities shall be promptly graded to ensure positive drainage and to conform and blend with the existing ground surface. Lawn seeding and plant materials installation shall occur within twelve (12) months of dwelling occupancy. A minimum of 3 trees and 6 shrubs shall be installed and maintained on each Lot within 12 months of

occupancy.

Adequate Drainage. The Owners and their contractors are required to ensure that proper and adequate drainage exists on the Lot to ensure that the Lot does not cause drainage or flooding damage to surrounding Lots. As a general rule, the Owners shall ensure that the Lots have proper drainage from the back of the Lot toward the front and street, unless it is determined by the Architectural Control Committee that it is appropriate for the Lot to drain in another direction to protect that Lot or adjoining Lots. Should flooding or other drainage issues occur on the Owners' Lot that negatively impacts that Lot, surrounding Lots, or the Common Areas, the Owner is required to repair such drainage issue and ensure proper drainage from the Lot. In those cases where the Lot slopes toward the back of the Lot, the Architectural Control Committee may require the Owner to construct or install drainage mechanisms that drain water toward the street as a condition of approval of any Plans by the Committee. The Board of Directors may enforce this provision pursuant to the provisions of Article IX, hereinafter.

Underground Utilities. All utilities shall be underground including, but not limited to electric, telephone, and cable TV conductor lines. No overhead wiring or supporting poles of any kind shall be allowed, except for emergency alert systems.

Exterior Fencing. No chain link fences will be allowed. Fences are to be constructed of plastic or Cedar wood, or such other material that is comparable in quality and appearance as may be approved by the Architectural Control Committee. On those Lots that boarder Green Valley Road and Junietta Road, no

fence adjacent to the road will be taller than 3 feet in height. On all other Lots, no fence will be taller than 6 feet in height, except fences surrounding swimming pools, and no fence will extend past the back corners of the house toward the front of the house. No side yard or front yard fences will be allowed on any Lot, except on corner lots, where side yard fences may be permitted upon the prior written approval of the Architectural Control Committee.

Construction Quality. All construction shall meet current standards set forth in (1) the Uniform Building Code by International Conference of Building Officials with modifications as determined by the Architectural Control Committee and (2) building codes and regulations set forth by Pottawatomie County, Kansas.

Trash and debris shall be removed from each construction site on a regular basis. Lightweight material, packaging, and other items shall be weighted down to prevent wind from blowing such materials off the construction site. Mud and debris resulting from activity on the construction site shall be promptly removed from adjoining lots, public roads, and common open space. Every effort shall be made to preserve topsoil during construction activities and redistribute topsoil over disturbed ground surface areas at the conclusion of grading activities.

Waiver of Building Restrictions. The intent of the foregoing building restrictions are set forth as standards to encourage quality construction and quality visual appearance throughout the Subdivision. Upon application, any of the included restrictions or conditions may be waived on a case-by-case basis by the Architectural Control Committee or the Board of Directors if such revisions or

variances are determined to be with good cause and/or in the best interest of the Subdivision.

Stormwater Pollution Prevention Plan. The Developer will obtain a Construction Stormwater Permit ("Permit") for the entire development. That permit will include a Stormwater Pollution Prevention Plan ("SWP2") that sets forth the "best management practices" that will be utilized to control erosion, sediment discharges, and reduce the potential of the contamination of stormwater runoff associated with construction activities, as well as comply with the other permit requirements. That Permit will be provided to each Lot Owner at the close of the Lot sale. Each Lot Owner is required to comply with each provision of the Permit. Additionally, each Lot Owner is required to complete a Kansas Department of Health & Environment ("KDHE") Individual Lot Certification ("ILC"). The ILC is an agreement between the Lot Owner and the States of Kansas to implement the SWP2 plan and meet all conditions of the Stormwater Pollution Permit. Construction site soil activities shall not begin until the Lot Owner receives Authorization from the KDHE Bureau of Water. Notwithstanding the terms of Article IX of this Declaration, should an Owner or his contractor fail to comply with these requirements, the Board of Directors may, without providing prior notice to the Owner, perform the steps necessary to bring the Lot into compliance with the Permit or SWP2 and charge the Owner through a Special Assessment to the Owner's Association dues account. The Owner will be provided a notice of such Special Assessment, and if the Costs and expenses necessary to correct violations

remain unpaid after 60-days, the debt to the Association may become a lien upon the Lot of the Owner, enforceable as a lien upon recording of the debt and lien in accordance with Kansas lien law.

**ARTICLE VIII
GENERAL COVENANTS AND RESTRICTIONS**

Driveway/Street Parking. No wrecked, decrepit, unserviceable or unused vehicles shall be parked on driveways or lawn areas; nor shall said driveway or lawn area be used to make major repairs on automobiles or other vehicles. The parking of trucks above the one-ton category or construction equipment in driveways or on streets on a continuing basis shall be prohibited. The parking of vehicles and/or boats, water craft or trailers of any sort on the street for longer than a twenty-four (24) hour period shall be prohibited.

Household Pets. Owners may keep normal household pets provided they do not constitute a nuisance, a danger, or visual distraction to adjoining Lot Owners or the Subdivision as a whole. Unattended pets shall not be allowed beyond the Owner's property. Outside pens, kennels or structures for the keeping of pets shall be architecturally compatible and shall be placed in the rear yard, and shall have a non-permeable floor surface such as concrete or asphalt, and completely screened from the view of adjacent neighbors. All construction of outside enclosures for household pets shall be approved by the Architectural Control Committee. Household pets, in terms of noise, barking, odor, and view should be the problem of the Owner rather than adjacent neighbors, and if the pets cause

odor or excessive pet noise, the Owner shall be prohibited from keeping pets on the Property. No commercial kennels or breeding facilities shall be kept or placed on any lot.

Gardens. Garden plots are allowed and encouraged; however, garden plots shall not be permitted in front lawn areas. Garden plots are defined generally as plots for the raising of vegetables and do not include flower borders, landscape planting beds, or minor landscape improvements.

Trash Storage/Removal. Trash shall be stored in metal or plastic, leak-proof, air-tight containers. Trash containers shall be stored within the garage or an enclosed, screened area immediately attached to the dwelling structure and available for removal on designated pickup days. Burning of trash, grass, weeds, etc., is prohibited. The Developer strongly urges the Association to select and contract with a single trash removal company or contractor for the trash removal of the entire Development. If the Association contracts for trash removal, the Association will pay for trash removal services and will assess a proportionate share of the common expenses of the Association for such removal services to each Owner as a Regular Assessment.

Easements. Owners grant agents and employee of the Association, the Sewer and Water Utility District Authority, and various utility companies serving the Subdivision, including, but not limited to Kansas Power and Light Company, Southwestern Bell Telephone Company, and any future named cable television company an easement and access across their Lot, exclusive of dwelling area and

as indicated on the plat, for the installation , repair, and maintenance of utilities, drainage, reading of meters, trash pickup, and exterior upkeep of dilapidated, unkempt properties and improvements thereon.
